

**UNIVERSITY OF
ALBERTA**

Participate in a Research Study of Exercise Training in Congenital Heart Disease

We are looking for individuals 16 years of age or older to participate in a research study of exercise training at the Mazankowski Alberta Heart Institute.

If you have one of the following congenital heart conditions:

- **Tetralogy of Fallot**
- **VSD with pulmonary atresia**
- **Double outlet right ventricle**
- **Ebstein's anomaly**
- **Congenital pulmonary stenosis**
- **Transposition of the great arteries repaired with a Rastelli procedure**

live in Edmonton and are available to attend exercise training sessions three times weekly, please contact Dr. Isabelle Vonder Muhll for further information.
